I was a student at Aaker's Business College, Fargo, N. D. for nine months, devoting most of my time to the Short-hand course, from which I hold a diploma and completing a three months course in bookkeeping. I have attended other schools, but prefer the A. B. College. Through Prof. Aaker I secured a position as stenographer and bookkeeper in P. E. Sundberg's elegant jewelry store, this city. Twice before I was offered positions through Prof. Aaker, so it seems that the school has more positions than it can fill.

Respectfully,  
**NETTIE JOHNSON.**

Specimen boxes and the prices will soon be here and patrons can then leave their order.

Russell Purinton has a new kind of barley that he is experimenting with—a hullless variety. It looks a great deal like wheat and is said to be very prolific, 60 bushels per acre being an average crop. Mr. Purinton planted a small patch this year. He planted it rather early so that it matured during the dry season and had very short heads and short straw, nevertheless he got 40 bushels per acre from it. Russell thinks that it will not be necessary to plant half the farm to feed grain hereafter.

Leonard Dare, Harry Sherlin and Lawrence McAllister, who had been working for F. D. Williams this fall, left on Wednesday of last week for their home at Walkerton, Ind. On Saturday afternoon the Courier was in receipt of telegrams from Minneapolis stating that Leonard Dare had been found murdered on a box car at that place, a bullet hole being found between his eyes. His companions could not be found and information was wanted. They left Cooperstown together and it is thought that his traveling companions might have had something to do with his murder, although it is shown in an article in the twin city papers that several fellows with masks on had been holding up working men on freight cars at that time. McAllister and Sherlin could not be found. Mr. Williams only paid them about \$35 each when they quit his job, and Foreman John Houghton of the Cooper farm says that the three worked for him this last summer and that they each drew about \$32. We hardly believe that McAllister or Sherlin had anything to do with the murder.

The Cusons Milling Co., last Saturday shipped a car load of their flour to Sanborn. This is the first consignment of 2100 sacks. As Sanborn is pretty close to the Russell-Miller Company's big Valley City mills, this is quite an ad. for the Cooperstown mill—and shows that the people at Sanborn appreciate good flour.

The carpenters have about concluded the finishing touches on E. W. Blackwell's new residence and the building is now in the hands of the painters and plumbers. We guess that E. W. will not be anxious to boss another job of house building for some time—especially if help is as scarce as it was this summer.

States Attorney E. T. Burke, of Barnes county, who in addition to being a tip-top good fellow as well as a good lawyer, was in the city last Saturday giving a few friends a pleasant handshake—of the collection variety. Mr. Burke is a base-ball crank and says that Valley City will have the gold-digest ball club next year that ever happened and wants us to be prepared or get off the earth. We certainly will fix those fellows from the tortuous Shyenne Valley all right, Mr. Burke.

Henry has lots of friends here who will wish him all kinds of good luck.

It is generally supposed that there are eight furlongs in a mile, but there were four members of the Furlong family and the Courier scribe who thought that there were at least sixty furlongs in a mile—and the rest of you would think the same if you had been caught out in a rain storm and had to carry your wheel a mile like we did last Sunday evening.

Three traveling men dropped into a neighboring town recently to make collections. One represented a brewing company, the other a hardware house and the third one a grocery house. The first named gathered in \$140 in good hard cash while the other two got nothing. It would seem from that as if the breweries got most of the spare change around that town.

**Separator Burned.**

C. J. Erlanson was in from Mabel township Tuesday and informs us that his separator was entirely destroyed by fire that morning between four and five o'clock. He is of the opinion that somebody set fire to the machine as there was no fire in the engine since Sunday and it had been raining ever since. The loss comes heavy on Mr. Erlanson as he still has about 10 days threshing to do. He offers \$50 reward to anybody who will give information as to who set fire to his machine.
