A number of our customers have asked when we were going to Coopertown. We haven't any such intention at present nor will we have any desire so long as our trade takes in so large a proportion of the grain that comes to town. Two years more like the past two will enable us to pay for our house, and that is good enough for anybody. We are not infallible in the matter of grades, nor can we buck the old line companies off the track on prices but any farmer who is dissatisfied with either grade or price can ship his own grain through the house at a very small cost.
