## A VENERABLE PASTOR CURED BY PE-RU-NA.

Pe-ru-na is a Catarrhal Tonic **Especially Adapted to the De**clining Powers of Old Age.

In old age the mucous membranes become thickened and partly lose their

function.

This leads to partial loss of hearing, smell and taste, as well as digestive disturbances.
Peruna corrects all this by its specific

operation on all the mucous membranes-

of the body.
One bottle will convince anyone. Once used and Peruna becomes a life-long stand-by with old and young.

Strong and Vigorous at the Age of Eighty-eight.

Rev. J. N. Parker, Utica, N. Y., writes: "In June, 1901, I lost my sense of hearing had been somewhat impaired for several years, but not so much affected but that I could hold converse with my friends; but in June, 1901, my sense of hearing left me so that I could hear no sound whatever.

If you do not receive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be added to the satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be added to the satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be added to the satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will I was also troubled with rheumatic pains in my limbs. I commenced taking Peruna and now my hearing is restored as good as it was prior to June, 1901. My rheumatic pains are all gone. I cannot Ohio.

when 88 years old can say it has invigorated my whole system. I cannot but think, dear Doctor, that you must feel very thankful to the all loving Father that you have been permitted to live, and by your skill be such a blessing as you have been to suffering humanity."

—Rev. J. N. Parker. A Bishop's Letter. T. H. Lomax, D. D., Bishop and Dist. A. M. E., of Charlotte, N. C., writes: "I recommend your Feruna to all who want a strengthening tonic and a very

The spring is the best time to treat catarrh. Nature renews herself every spring. The system is rejuvenated by spring weather. This renders medicines more effective. A short course of Peruna, assisted by the balmy air of spring, will cure old, stubborn cases of catarrh that have resisted treatment for years. Everybody should have a copy of Dr. Hartman's latest book on catarrh. Address The aid for roads. The meeting next year Peruna Medicine Co., Columbus, Ohio.

Not Wasteful.

"I suppose," said the physician, after he had sounded the new patient, "that you exercise judgment in the matter of smoking? You do not indulge to foolish excess in it?"

excess in it?"

"No, indeed," replied the inveterate individual. "I never smoke more than one cigar at a time."—Cincinnati Times-Star. Moravian Barley and Spelts,

A word to the wise is superfluous.—

BURNING OF COB CHARCOA

Its Use Is a Material Insurance Against Disease in Hogs and Poultry, Especially Cholera.

Cob charcoal is made by burning dry, well preserved corn cobs under a smothered fire. The simplest method is to dig a funnel-shaped pit, as shown in the cut, starting a fire at the bottom and so adding cobs that the fire will be gradually drawn to the top of the pit when completely filled. Over the mouth of the pit place a sheet iron lid. or other fireproof covering, making the

CROSS SECTION OF PIT.

edges of this perfectly airtight by sealing with earth. After this mass has smoldered for 10 or 12 hours, a very good quality of cob, charcoal will be found upon removing the cover, when the mass should be shoveled out and spread to prevent the possibility of combustion and burning to ashes.

Charcoal is as valuable for poultry as for pigs, because of its cleansing and absorbent properties, being a most efficient internal antiseptic. Its use is a material insurance against disease, especially cholers.-Farm and Home.

GREAT NATIONAL HIGHWAY.

Good Roads Association Urges Building of One Between New York and Chicago.

The first annual meeting of the New York and Chicago Good Roads association, at Erie, Pa., closed with the adoption of a resolution favoring the building of a national highway between the two cities named through the southern tier of counties of New York and westwardly along the lake shore through Cleveland and Toledo to Chicago.

Joseph W. Hunter, state highway commissioner of Pennsylvania, was instructed to go over the proposed route and estimate the cost of construction. will be in Elmira, N. Y:

John Farson, of Chicago, one of the delegates, pleaded for an interstate system of highways.

"The people of this nation are losing hundreds of millions of dollars annually from failure to provide ordinary good roads for the movement of farm produce," said Mr. Farson. "We may well afraid that object-lesson roads are only ask ourselves if the federal government a stepping stone to national aid of has acted wisely in lending its aid to vastly greater dimensions, and in this manufacturing and commercial industries of the nation with a prodigal hand, and at the same time withholding its support from the development of country roads. The tonnage of farm produce on country wagon roads itself reaches agriculture and many more are exthe enormous sum of \$600,000,000 yearly. Every penny of this is added to the price of the products, and it is the dwellers in cities and towns, as well as in rural districts, who pay the added cost."

GOOD ROADS A NECESSITY.

Quite as Essential to the Development of a Government as Up-to-

"Good plain roads are as necessary as good railroads to a well-ordered state." These are the words of a statesman and not of a good-roads specialist. They are the deliberate utterance of M. J. J. Jusserand, ambassador from France to the United States in the twentieth century.

Date Railroads.

Such words ought to go ringing through the length and breadth of the land, heard and heeded by selectmen, road supervisors, county commissioners and legislators, state and national. A second La Fayette is come to save us in peace as the first great Frenchman did in times of war. Here is a paragraph written by M. J. J. Jusserand in Washington, for publication, on August 8, 1903:

"Whatever be your profession, cyclism will teach you some of the virtues which will insure your success. There is no exception to diplomats; cyclism teaches to be prudent, to move peacefully, and noiselessly, and to mind their neighbor. Cyclism has lessons even for governments. To governments it will teach that good plain roads are as necessary as good railroads in a well-ordered state."

Improve Main Thoroughfares. Frequent complaint is made by people who live at a remote distance from the villages and public centers, that nothing is done to improve the back roads on which they live, and that they are taxed to benefit other roads in the seems to be some justice in this plea. and yet it would be poor policy to exlong to all. The persons who live in the greater profitable interest in main roads est village is their village, and all pub-Thomas, in Farm and Home.

BROWN!OW IDEA POPULAR.

Progress of the Good Roads Movement in Congress Is Gratifying to Its Advocates.

The movement in favor of a national appropriation to aid in the building of roads appears to be making great headway. This is proven by the number and enthusiasm of its supporters, and even more strikingly by the consternation of those who are openly or secretly opposed to the scheme. When the agricultural bill came up in the national house of representatives recently, remarks were dropped by a number of speakers which indicated that letters, petitions and resolutions demanding the passage of the Brownlow road bill are coming in from all sections. The same thing happened again when the bill came up in the senate. Senator Bailey, of Texas, who is opposed to national aid, said it was easy to see what is coming, and addressed this significant remark: "I will live, if I live as long as my father has done, to see a federal officer probably supervising all the country roads in this country."

While none of the so-called good roads bills have come up for action in either end of the capitol, the friends of the road office in the department of agriculture have scored an important victory in securing in the senate an increase of \$45,000 in the appropriations for road investigations, and experiments including the building of objectesson roads.

This is a national aid on a small scale. But it is of great importance from an educational point of view. Heretofore this object lesson work has bean conducted in the following manner: An application is sent in by some experiment station or agricultural college, or by road officials or publicspirited citizens of some progressive community, asking the government to cooperate in the building of a short stretch of road. The government usually furnishes nothing more than an engineer or an expert to make plans and supervise the work. Road-making machinery is usually furnished free of charge by the manufacturers for the sake of the advertisement it gives them. The railroads, also, take a hand and transport the machinery free. The institution or community making the application has to foot the bills for labor and materials

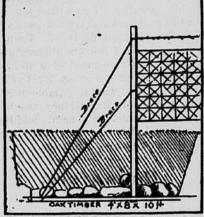

Among the benefits flowing from such work are (1) that it gives an excellent opportunity to investigate and test the various local materials; (2) that it gives the people of that locality a lesson in the methods of road building and in the use of road materials and machinery; and (3) that the building of a short piece of good road usually leads to the building of a large mileage of improved road in the vicinity. To have Uncle Sam come into a community and help build a good road, be it ever so short, seems to arouse great popular interest and stimulate local effort. It is claimed by those who know most about the results of the work already done, that in no other direction does the government accomplish so much with so little out-

But the opponents of national aid are they are probably right. However that may be, it appears certain that object-lesson road building will be carried on next year to a larger extent than ever before. Many applications are now on file in the department of pected.

AN IMPROVISED END POST.

Made of Old Axles and Is Strong Enough Not to Give, Neither Can It Heave Up.

I have used for several years homemade iron fence posts (for end posts) that give entire satisfaction. I use old buggy or wagon axles. Three axles

HOW THE POSTS ARE BRACED. will make two posts, by cutting one in two and welding an end on each of the other two. The guard bar of an old binder makes an excellent end post. Such things should never be sold as junk.

By fastening a piece of timber to the end of post, and running braces back to the piece of timber, it makes a very solid affair. The timber should be buried well down, near four feet, and rocks piled on it, and you have a post that will not give and cannot heave up.-Ohio Farmer.

Always Turn to the Right.

It is the long-established custom in this country that vehicles meeting on any street or highway shall turn to the more populous parts of the town. There right. Some suppose that this is only an unwritten law of the road, but as a matter of fact, it is on many statute books. pend state money upon any but the main | The law in many states clearly defines roads or thoroughfares. These roads be- that carriages, wagons, carts, sleighs, sleds, bicycles, tricycles and all other most remote parts of the town have a vehicles must, when in motion, keep to the right. A person driving is very than they are apt to realize. The near- properly required to have the left wheels of his vehicle on the right of the center lic improvements there made enhance of the street. In other words this law the value of their own property.-W. A. is an authoritative adoption of the old motto: "Fair play and half the road."

Miss Hapgood tells how she was cured of Fallopian and Ovarian Inflammationand escaped an awful operation by using Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM: - I suffered for four years with what the doctors called Salpingitis (inflammation of the fallopian tubes) and ovadoctors called Salpingitis (inflammation of the fallopian tubes) and ovaritis, which are most distressing and painful ailments, affecting all the surrounding parts, undermining the constitution, and sapping the life forces. If you had seen me a year ago, before I began taking Lydia E. Pinkham's Vegetable Compound, and had noticed the sunken eyes, sallow complexion, and general emaciated condition, and compared that person with me as I am today, robust, hearty and well, you would not wonder that I feel thankful to you and your wonderful medicine, which restored me to new life and health in five months, and saved me from an awful operation."—Miss Irene Hargood, 1022 Sandwich St., Windsor, Ont. Windsor, Ont.

Ovaries or inflammation of the ovaries or fallopian tubes which adjoin the ovaries may result from sudden stopping of the monthly flow, from inflammation of the womb, and many other causes. The slightest indication of trouble with the ovaries, indicated by dull throbbing pain in the side, accompanied by heat and shooting pains, should claim your instant attention. It will not cure itself, and a hospital operation, with all its terrors, may easily result from

"DEAR MRS. PINEHAM: - I can truly say that you have saved "Dear Mrs. Pinkham:—I can truly say that you have saved my life, and I cannot express my gratitude to you in words.

"Before I wrote to you telling how I felt, I had doctored for over two years steady and spent lots of money in medicine besides, but it all failed to do me any good. My menses did not appear in that time, and I suffered much pain. I would daily have fainting spells, headache, backache and bearing down pain, and was so weak that it was hard for me to do my work.

"I used your medicine and treatment as directed, and after taking three bottles of Lydia E. Pinkham's Vegetable Compound, menses appeared, my womb troubles left me, and I have been regular ever since. I used fourteen bottles of Lydia E. Pinkham's Vegetable Compound and Blood Purifier together, and am now restored to perfect health. Had it not been for you, I would have been in my grave.

you, I would have been in my grave.
