Fraud Exposed.

A few counterfeiters have lately been making and trying to sell imitations of Dr. King's New Discovery for Consumption, Coughs and Colds, and other medicines, thereby defrauding the public. This is to warn you to beware of such people, who seek to profit, through stealing the reputation of remedies which have been successfully curing diseases, for over 35 years. A sure protection, to you, is our name on the wrapper. Look for it, on all Dr. King's, or Bucklen's remedies, as all others are mere imitations. H. E. Bucklen & Co., Chicago, Ill., and Windsor, Canada.

Made by Thunderbolts.

In the museums of nearly all the large colleges you will see what appear to be sandy petrifications much resembling branches of trees. You may conclude that these are the remains of forest monsters that grew in a far-away geological age, but if you will take the trouble to ask your guide, or better still, one of the professors, who are always handy, he will tell you a queer story—one, in fact, that "smacks of the marvelous." These tame looking, supposed to be sandy petrifications are, in fact, real "thunderbolts." Scientifically speaking they are "fulgurites." They are composed of a poor quality of glass and are made by the lightning striking sandy deserts and plunging downward and latterly vitrifying all the sand with which it comes in direct contact. On the Sahara fulgurites are found in every conceivable shape and size, some three or more feet in length and four inches in diameter, others not larger than a lead pencil and still others not larger than a knitting needle. Scientists usually consider fulgurites as being a good index to the size and force of discharge of the lightning stroke which formed them.

Climatic Paradox.

It is not generally known that at certain seasons of the year it is warmer in Greenland than in southern Europe. And this occurs during the long unseasonable winter of the polar regions. The cause which leads to it is not unknown in other countries. Thus in Switzerland a warm dry wind, called the foehn wind, at times blows down from the snow covered mountains in autumn and winter and suddenly melts and carries off the snow, drying up the atmosphere.

In the northwestern United States there is a similar wind called the chinook wind. So in Greenland at irregular intervals a warm wind blows down from the snow covered interior, bringing an extensive thaw in January and February. As a result we have the extraordinary fact that during eight consecutive days in November and December in one year it was warmer in Jakkohaven, in latitude 69 degrees 20 minutes, than in northern Italy. Upernavik, another town of Greenland, was, during part of the time, warmer than the south of France.

Grave Trouble Foreseen.

It needs but little foresight to tell that when your stomach and liver are badly affected, grave trouble is ahead unless you take the proper medicine for your disease, as Mrs. John A. Young, of Clay, N. Y., did. She says: "I had neuralgia of the liver and stomach, my heart was weakened, and I could not eat. I was very bad for a long time, but in Electric Bitters, I found just what I needed, for the quickly relieved and cured me." Best medicine for weak women. Sold under guarantee by H. H. Bateman, druggist, at 50c a bottle.

Flogging.

The Jewish rabbi had a legend which carries corporal punishment back to the days of our first parents, which is quaintly reflected in that modern schoolboy's play upon names, "Adam Seth Eve Cain Abel." Of course there is, too, the warning of Solomon, "He that spareth the rod hateth his son," or the old Egyptian proverb, "The back of a lad is made that he may hearken to him that beats it," but if we must go on history alone the earliest records belong to the Romans, who practiced flogging in several degrees of severity. There were the ferula, a flat strip of leather, a comparatively mild persuader; the scutica, a harsher instrument of twisted parchment, and the flagellum, a cruel scourge of leather thongs.

Diamonds on Board Ship.

Millions of dollars' worth of diamonds are imported into this country every year. In carrying packages of such tremendous value over seas extraordinary precautions are taken. They are immured in strong safes and so carefully guarded that not an instance has ever been recorded in which diamonds have been lost or stolen, though a man could easily walk off with half a million dollars' worth of gems in his waistcoat pockets were it not that it is one of the most difficult undertakings in the world to commit such a theft or even to find where the gems are stored on shipboard.

Coffins as Furniture.

A man living at Queensbury not only uses his coffin as a piece of household furniture, but he has also a grave made in the local churchyard headed by a gravestone on which his name is set out in conventional style. Underneath is the line, "Not dead, but waiting." One man at Toog, near Bradford, kept his Sunday clothes in his coffin, and another, who ate porridge at breakfast, used his coffin as a meal bin. Some years ago a Kelghly man kept butterfly specimens in his coffin.—London Mail.

Agonizing Burns

are instantly relieved, and perfectly healed, by Bucklen's Arnica Salve. C. Rivenbark, Jr., of Norfolk, Va., writes: "I burnt my knee dreadfully; that it blistered all over. Bucklen's Arnica Salve stopped the pain, and healed it without a scar." Also heals all wounds and sores. 25c at H. H. Bateman, druggist.
