Frank Gladstone went out into the country last Friday night to attend a party and was so interested in delivering a lecture on botany to some of the young ladies enroute that he lost his bonnet but did not discover the fact until he had gone a few miles. Some of the boys say that he borrowed a ladies hand bag and wore that for a cap the rest of the way but the genial states attorney enters a plea of not guilty, but the plea was set aside by the crowd on the ground that it was incompetent, immaterial and not according to the facts.

J. M. Freer was a caller on the COURIER last Thursday and spent a few minutes visiting the editor, during which time we relieved him of some of his surplus cash to put him in good standing with his dues paid a year in advance. Mr. Freer informs the COURIER that the probabilities are that Hannaford will have a telephone exchange and the farmers a rural telephone line, running in different directions from Hannaford. There is nothing that will please the farmers better than good telephone service out to their farms and we hope they will put the deal through.

The evening was very enjoyably spent by the company in playing various games and it was Saturday morning before the company realized how fast time sped by when you are being so well entertained. A very fine luncheon was served and the town folks did not get home until it was almost time for breakfast, each and every one voting the entertainment afforded them by Mr. and Mrs. Houghton one of the best times of their lives. Theo. Thompson succeeded in pinning a tail on the donkey's nose and was voted the booby prize, but he claims a foul by Frank Gladstone. The objection was overruled.

These last few days of warm, beautiful weather, has carried away what little snow we had and the country roads are fine for this season of the year. Of course this warm weather is liable to catch cold but we will enjoy it while it lasts anyway.

I will open a public training stable again this season commencing April 1st. Also will take a few colts to break.

W. D. HEIMBAUGH, Cooperstown, N. D.

The warm and beautiful weather of the past week has cut a large hole in the rear end of winter and has helped to stretch the coal supply considerably. The snow has all gone off the level. However we still have time enough to get all kinds of snow and storms before spring sets in.

It is reported that one of our deputies at the court house has the plans out for a substantial home that he intends to build in the city in the near future. Now this young man is unmarried and just what he wants a house for is a mystery. However the COURIER has been given a hunch that he will shortly lead one of Griggs county's young ladies to Hymen's altar, which accounts for this activity along this home building line.

William Stringer returned Monday from Southern Idaho, loaded to the muzzle about the beautiful climate and the beauties of that land. He liked it so well that he purchased for himself 80 acres of land a mile and a half from the town of Mountain Home and also 40 acres for Rier Anderson. William expects to start a jackrabbit herd down there some time—these frisky little pests being quite numerous down in that glorious climate of Idaho. Mr. Stringer had a fine trip and found the country what it had been represented to him, although he is not satisfied with the water supply in sight and water is the main thing—no water, no crops.

His office hours are from 10 to 4 and 7 to 8.

The indications are that there will be quite a number of substantial residences built in Cooperstown this year, some of them costing considerable money. This town is bound to grow steadily every year as the country grows in prosperity, because our farmer friends are getting into shape to move to town to give their children an education, and they have to have houses to live in.

MANAGER OF THE FARMER'S FARM.

On and after March 1st, 1905, The "Webb-Shaw" or Farmer Experiment Farm will be managed by Mr. Charles McKissick,

for the past 18 years superintendent of the 8,000 acre Mayville (or Grandin) Farm, Mayville, N. Dak. Mr. McKissick has had a life long successful experience as a farmer, live stock breeder and feeder. No better hogs or cattle come into to South St. Paul market than those fed by him at Mayville. While wheat has been the chief crop there, corn and other cereals come in for a share of attention, and uniformly good crops have been secured under Mr. McKissick's management. Seven hundred March and May hogs were marketed from the Mayville Farm in November and December last, averaging over 200 lbs. besides several carloads of cattle in prime condition.

This is for the purpose of securing such results under favorable conditions, that the publisher of The Farmer has induced Mr. McKissick to join The Farmer staff and identify himself with our farm; for the farm and The Farmer are both one in aim, the farm contributing to the value of the paper, and the paper the farm.
