The biggest thing ever offered at the North Dakota Chautauqua is William J. Bryan who will be there, Sunday, July 9. While many do not believe the same way politically as he does, none, not even his bitterest enemies, deny his intellectual brilliancy nor his matchless oratory. He has been the central figure in American politics for ten years, and the fact that by his own personal magnetism he swept a national convention off its feet, and by his eloquence snatched from chaos an honor for which the greatest men of the nation have striven for years, is proof of his greatness as a man. The opportunity to hear such a man does not always come so near the people of this state.

The following on the automobile we clip from the Litchville Bulletin: The automobile is a machine that is always going somewhere but never gets there.

A man who has automobiles is cranky. If you doubt this watch any of them trying to start a machine. You can tell a man who owns an automobile as far as you can smell him by that Rockefeller odor, or as far as you can see him by the seraphic expression on his countenance, or as far as you can hear him by the rapid and explosive use of reckless language. He carries with him at all times a house moving outfit, ropes jackscrews, and cork screws; with an extra bottle of gasoline—on ice—most of the time. When you see one coming, turn your horse loose and climb the first telephone pole—you may escape without permanent or fatal injuries. If you see an automobile stop sooner suddenly in the road and the owner crawl under it fifteen or twenty times and then walk around it several hundred times, waving his arms now and then, hitch up and go to his assistance. Tell him you are very busy, but most any of them will pay you \$5 to haul them to town and will give you \$1 extra for an old halter rope for cable tow. When you get to town go down Main street slowly and carefully and don't let him show you a nearer way thru the back alleys. Alleys are full of broken malt bottles and they puncture tires as well as pocketbooks. Fellows who own one. If he is wise he will build new. It costs more to remodel than to build new and then you have a patched up house.

The Commercial Club met last Monday night the chief attraction of the evening being the much discussed subject of an electric light plant. It was the opinion of nearly all present that we have such a plant but there were about fifty different views as to how we should get it. Some wanted a franchise granted to an individual, others wanted municipal ownership while others were in favor of a stock company of local business men. Finally it was voted to send somebody to investigate plants in different towns and get a practical idea of what it cost to operate a plant and the best and cheapest methods, and Mr. And Goff was elected to take this trip and report his findings to the club at the next meeting. The business men want an electric light plant and are going at it in the right way. We are against bonding for a plant and also against a stock company and much prefer to see a franchise granted to a good man, however, if there are enough of our business men who want to form a stock company we are willing they should but so far as the editor of this paper is concerned we would not take any stock.
