SPECIALISTS.

The Hannaford-Cooperstown Concrete Co. was located at Hannaford for the simple reason that there was to be had the best sand in the state. Having such sand and competent workmen, we offer goods that can not be excelled. The body of our sidewalk tiling is not of inferior material with a good surface, but is the same throughout. Now a word to those contemplating building stores, residences or office buildings. Concrete construction has passed the experimental stage. Time has proven that concrete buildings are as durable as stone, more durable than brick, and of only the same cost as wooden construction. It is fireproof, warm in winter, cool in summer, and of very handsome appearance. Let us figure with you if you contemplate building or laying a sidewalk.

HANNAFORD COOPERSTOWN CONCRETE CO.

The owner of the Makepeace flour plied the wants of his household.

"Those last apples you sent us wer good," he said, with a keen eye fixed on the other man's face, "but they were in undersized barrels, my wife tells me, smaller than ever before. She says that the three barrels would scarcely make two and a half of the proper size. How do you account for it?"

"I can't," said the provision dealer, with apparent distress of mind. "I swan I can't! I just had my wife send me down three of your barrels that we've been getting flour in and just packed the apples in and headed em up with burlap, for says I to her, 'I believe in reciprocity, and I'm bound he shall have just as good measure of apples as we get of flour,' I says. Now, don't it beat all?"

Kentucky possesses in the Mammoth cave one of the natural wonders of the world: but, while this is the largest of its caverns and, so far as known, the largest in the world, there are hundreds of others of inferior but still of great in addition, 4,000 sink holes of various sizes and depths. In Colossal cavern discovered in 1895, what is believed to be the largest stalagmite in the world has been named "Henry Clary's monument." It is ninety feet high and thirty feet thick at the base. The cavern is only about a mile and a half from the the great Mammoth cave and is said to be in some respects even more wonderful than the latter, though not so
