### AMABILITY.

One Need Be Neither Weak Nor Stupid to Have This Quality.

By a process of false reasoning amability has been connected both colloquially and in writing with weakness and stupidity. Strength and ability insure it to no one; consequently, says that hasty judge, the public, it usually exists without them. Nothing was ever more untrue. Stupid people and weak people may be—they very seldom are—amiable by nature, but they are the only people for whom it is nearly impossible to cultivate amability. It is very difficult for a really weak man to be sweet tempered.

The first thing which the person who desires to be amiable must determine to do is never to produce fear among his own surrounding—to be willing, in a social sense, to let every one off, so that no one regrets too bitterly having said a foolish or ill judged thing before him, but comforts himself with the thought, that it is forgotten; never, that is, to lower any one in his own esteem. The second is not to debase sincerity into contradictoriness, and not to set for other people a standard which is unreasonable to suppose, from previous experience of their characters, that they will ever reach. The third is never to let his good principle interfere with some one else's harmless privilege, to remember that praise is a positive necessity to the spiritual and mental development of the young, and that injudicious blame acts as a blight.—London Spectator.

### HOW TO SUCCEED.

When You Go to Work Take the Whole Man to the Task.

Only fresh, spontaneous work really counts. If you have to drive yourself to your task, if you have to drag yourself to your work every morning because of exhausted vitality, if you feel fatigued or out of it, if there is no elasticity in your step or movements, your work will partake of your weakness.

Make it a rule to go to your work every morning fresh and vigorous. You cannot afford to take hold of the task upon which your life's success rests with the tips of your fingers. You cannot afford to bring only a fraction of yourself to your work. You want to go to it a whole man, fresh, strong and vigorous, so that it will be spontaneous, not forced; buoyant, not heavy. You want to go to your work with creative energy and originality—possessed of a strong, powerful individuality. If you go to it with jaded faculties and a sense of lassitude after a night's dissipation or loss of sleep, it will inevitably suffer. Everything you do will bear the impress of weakness, and there is no success or satisfaction in weakness.

This is just where a great many people fall—in not bringing all of themselves to their task. The man who goes to his task with debilitated energy and low vitality, with all of his standards down and his ideals lagging, with a wavering mind and uncertain step, will never produce anything worth while.—Success.

### Odd Art Criticisms.

A young woman of great, perhaps too great, sensibility, according to the Dundee Advertiser, begged to be excused from visiting an aunt who lived in an old fashioned house where pictures of a certain period were in evidence. There is an engraving of a blacksmith's shop in the dining room," said she hysterically. "You can't expect me to eat my dinner there; I smell the hooft."

A similar criticism came from one who suffered, not from overrefinement, but from something quite different. "She was a woman of recently acquired wealth, who went into an art gallery and asked for a painting of a certain size. 'I have just what you want,'" said the dealer. He showed her a beautiful animal painting, but she looked at it for a few minutes and then shook her head. "It won't do," she said; "I want this picture for my drawing room." "But it's a beautiful thing," ventured the dealer. "Not for a drawing room," announced the woman conclusively; "you couldn't have a cow in a drawing room."

### Puzzles From the Greek.

If two are a few, why not three; if three, why not four, and by a gradually advancing increment of number why not 10,000 or any other number? Or, again, if the loss of a single hair does not make a man bald, why should the loss of two, of three, and so on, and inferentially the loss of all?

If, then, no addition or subtraction of a unit can transform a small number of wheat grains into a heap or a full head of hair into a bald head, how is it possible that either transition should ever be accomplished? Take a grain of millet out of a bushel and let it fall on the ground, and it makes no noise. Take every grain in succession of 10,000, let the same happen, and no sound is heard. Then collect all the grains back into the bushel and pour it out, and the result is a great noise. How, asks Zeno, can 10,000 noiseless processes make one full of noise?

### Trespassing.

According to the common law of England there can be no theft of things which form part of or are attached to the soil, and there is no statute or penalty against the gathering of wild flowers in a field or wood. Most people at some time or other have passed at the fearsome legend, "Trespassers Will Be Prosecuted," printed on the menacing board which lawyers have described as a "wooden liar," for, as a matter of fact, the mere walking across another man's field is no more a criminal offense than to walk along the highroad. If the trespasser does no actual damage there is no ground for prosecution, with any hope of obtaining more than merely nominal damages, and none but a born litigator would dream of taking action.—London Globe.

### A Progressive Institution.

Keeping pace with business development in Minnesota we find that educational matters have not been neglected. One of the largest educational institutions, the Electric Business College, after years of prosperity has by reason of its increased patronage, been pushed into larger quarters.

The College is located in its new home at the corner of Third Avenue South and Fifth Street. The location is the best the city affords, being a quiet corner in a refined section. The best faculty of business educators to be procured will be in charge of the various departments, which includes Bookkeeping, Shorthand, Typewriting, Penmanship, Telegraphy, Preparatory, Electrical Engineering, Civil Service, Teachers' and Physical Culture.

An attractive feature will be a thoroughly equipped gymnasium for both ladies and gentlemen. The large number of graduates holding responsible positions is a standing tribute to the thoroughness of the work. An inspection of the new quarters discloses the fact that the Electric will be the best and most thoroughly equipped commercial school in the Northwest.

The fall term opens September 4th. Any young person interested in commercial work should write the Electric Business College, Minneapolis, for terms and catalog. 40

## Ozone Cure for

Tuberculosis, Colds, Catarrh, Bronchial Affections, Asthma, Hay Fever, Congested Lungs, Lethargy, Rheumatism and All Germ Diseases.

Ozone manufactured by electricity, administered direct to the lungs—purifies every part of the body. Pure Ozone exerts a powerful therapeutic influence upon the respiratory organs. Pure Ozone, as properly applied by Dr. Cavanagh, director of The Fargo Sanitarium, tends to purify and also to increase the blood stream, building up diseased tissues and strengthening the system.

### Inefficiency of Drugs

Every physician realizes the inefficiency of the most potent drugs in dealing with many of the most common diseases. The germs float in the blood current, attacking first one organ of the system and then another, until, finally, a weak, vulnerable organ, finds itself unable to resist the attack and succumbs. But now Dr. Cavanagh's new Ozone apparatus properly applying this powerful gas to the patient renews the blood corpuscles, and is considered the most powerful alleviative medicine yet discovered.

### Application of Ozone

Ozone is carried into the body and is taken into localized areas from Dr. Cavanagh's Medical Ozone Generator by inhalation, bringing all the tissues of the lungs under its influence, passing through this tissue into the blood stream and destroying all germ diseases by removing the cause. A peculiar discovery was made by Dr. Cavanagh after long experience in which one-half better results are obtained if the patient is reclining and respiration is properly regulated when the gas is administered.

Write Dr. Cavanagh about your case. Write now. The Fargo Sanitarium is fully and modernly equipped—it is more the quiet home than a hospital—no smell of medicine, pleasant, light, roomy large porches, lawns, trees. Accommodations the best and very reasonable. Electric, magnetic, hot and cold water and hot air baths and manual treatments. Write today about your case and for terms. Do it now.

### WHY FOLKS MOVE TO NORTH DAKOTA

It takes a powerful argument to move a prosperous Illinois, Wisconsin or Indiana farmer, and his family from his old home to North Dakota. **THEY GO! THEY GO!** We have sold 2,500 farms in Morton and Hennepin Counties, N. Dakota, to farmers from Central Western States, and we never could have sold them one single acre if the land hadn't "made good" to those who first moved. They expect **FOUR TIMES THE PROFITS** for moving, and North Dakota is giving it to them and more, too. Yet, land producing \$20 to \$25 an acre in its second year is **STILL SELLING** for \$12.50 to \$18 an acre, and there are still free homesteads, 160 acres each, to the forward who make haste to look the country over and talk with their old neighbors. For excursion rates, maps and facts, write today.
