

USEFUL AND PLEASANT.

An oil well has been struck at Dallas, Wyoming. In New York forty-six stenographers on the city pay roll draw \$96,120 annual pay. Druid Hill park, Baltimore, has a baby camel, which was promptly named El Mehdi. A Bucks county, Pennsylvania, farmer, chloroformed his diseased cattle before killing them. Miss Weaver, of Kittanning, Pa., has had twenty-four needles taken from breast, side, and arms. There are two thousand Italian slaves under the padrone system in Philadelphia, says The Times, of that city. A bill in preparation in the Pennsylvania legislature proposed that skating rinks be taxed 1 percent of their gross receipts. Boston papers make rather light of the dynamite explosions, Sullivan's spees have made the Hub regardless of slight disturbances. At Yale 73 per cent of the students came from other states than Connecticut; at Harvard 45 per cent came from other than Massachusetts. A Boston clergyman is lecturing on "A Business Man's Conscience." For obvious reasons no "horrible example" accompanies the lecture. "This is good weather for the cholera," remarked a citizen on a zero morning. "Yes, but I haven't got the cholera," gloomily replied the second citizen. Cincinnati has under discussion the building of an elevated belt railroad around the city, the length of which will be seventeen miles, and the estimated cost \$5,000,000. Wilkesbarre citizens told the school principals that they did not want their "young girls" to deliver declamations in schools, as it has a tendency to make them very bold. Neal Dow is now convinced that the enemy to prohibition comes from the moderate drinkers. Hard drinkers are all anxious for the closing of the grog-shop as a relief from temptation. Richmond, Va., according to a published report, furnished gas from its gas-works (owned by the city) at less than 80 cents per 1,000 cubic feet last year, and had a net profit of \$94,000. It is said that Congressman Phil Thompson, when a prosecuting attorney in Kentucky, once asked his twin brother to try a case for him. He did so, and the court did not know the difference. Mr. E. R. Hoyt, a mechanical engineer at the New Orleans Exposition, was severely injured by a huge derrick pole falling on his foot. He was conveyed to his residence and after only three applications of St. Jacob's Oil, all the swelling and pain disappeared, and he resumed his duties. A Washington eccentric female genius has invented a "machine to lay a ghost." A much more useful contrivance in these days of business stagnation and indolent hens would be a machine to lay eggs. Prince Frederick Charles of Prussia is a great geographer, and but for his position and duties, would be a great traveler. His palace is called the Berlin African headquarters, and all explorers are welcome guests there. It is said that the bobolinks, "which are such dandylike, rollicking birds in the summer, go south in the autumn, take off their gaudy uniform, put on suits of rusty black, change their name, and become either reed or rice birds. The liquor dealers of Rome, Ga., says The Savannah News, are preparing to "boycott" a large number of men who continually drink to excess, thus injuring themselves and not benefiting the saloons. When the list is fully made out every saloon-keeper will forfeit \$50 if he ever sells to a man on the list. According to the recent decision of a Maine judge, all ponds in that state containing more than ten acres are public ponds, and the right to cut ice upon them is a public right, free to all. In this particular the owners of the shores have no greater rights than other persons who can reach the ponds without trespassing upon the land of others. The "Temple farm" at Yorktown, Va., on which is the Moore house, where the commissioners to draw up the articles of the surrender of Cornwallis met on Oct. 18, 1781, is advertised for sale. It was upon this farm that the ceremonies of the Yorktown centennial celebration took place, when the Moore house was made the home of the French guests. Quite a stir has been made among the health authorities of New Hampshire over the discovery of oleomargarine in Concord, and the fact that two tons of it are said to have been received in the city. The officials, according to a Concord dispatch, say that New Hampshire is flooded with adulterated articles of food of almost every description, and it is expected that a systematic investigation of the matter will be begun soon. The principal pawnshop in Mexico is owned and run by the government, and occupies the old palace where the viceroys lived while the country was a colonial possession of Spain. The viceroys seldom lived in the governmental palace, which stands on the location of the great Aztec temple. There is a tradition that every man who lived in that building ended his days in misfortune and misery. So the viceroys had a palace built across the plaza, where they lived without fear of this superstition.

Life in the Paris Sewers. It is possible, for a short time to the robust, but the majority of refined persons would prefer immediate death to existence in their reeking atmosphere. How much revolting to be in one's self living sewer. But this is actually the case with those in whom the inactivity of the liver drives the refuse matter of the body to escape through the lungs, breath, the pores, kidneys and bladder. It is astonishing that life remains in such a dwelling. Dr. Pierce's "Golden Medical Discovery" restores normal purity to the system and renews the whole being.

"Her face so fair, as flesh it seemed not, But heavenly portrait of bright angel's hue, Clear as the sky, without a blame or blot, Through goodly mixture of complexions due, And in her cheeks the vermilion red did show." This is the poet's description of a woman whose physical system was in a perfectly sound and healthy state, with every function acting properly, and is the enviable condition of its fair patrons produced by Dr. Pierce's "Favorite Prescription." Ten stores, being half of the business portion of Robinson, Kan., were burned recently. Loss, \$40,000; insurance, \$14,000.

Cough, Cold, Croup. CONSUMPTION AND REMEDY.

Of all the multitude of fearful ills that prey upon and destroy the human race, consumption stands out with distinctive prominence as the most alarming. A cold at first, then a neglected cough, leads to the development of this scourge of mankind. One remedy that has survived the test of trial is Allen's Lung Balm. Composed from the purest ingredients and free from all combinations of opium. For coughs, colds, croup, bronchitis and all other affections of the throat and lungs it stands unrivaled. It approaches so nearly a specific, that with the common sense directions around each bottle strictly complied with, ninety-five per cent of consumptive cases are permanently cured by this invaluable remedy. The safety of every family would be consulted by keeping a bottle of Allen's Lung Balm in the house, and have it ready for use when coughs, colds and croup make their unwelcome intrusion.

The Excelsior knitting mills at Bethlehem Pa., owned by J. J. Shimer, were destroyed by fire. Loss, \$25,000; partially insured.

A Popular Falacy. Many people think that Rheumatism cannot be cured. It is caused by a bad state of the blood which deposits poisonous matter in the joints and muscles causing lameness, stiffness and swelling of the joints and excruciating pains. Kidney-Wort will certainly effect a cure. It acts on the Kidneys, Liver and Bowels, stimulating them to a healthy action, purifies and enriches the blood and eliminates the poison from the system. Go to the nearest druggist, buy Kidney Wort and be cured.

Gen. Lizandro Barrillas succeeds Barrios a President of Guatemala.

It is not understood why druggists keep in stock so many kinds of medicines for coughs, colds and consumption, when it is only necessary to keep Allen's Lung Balm, that old, reliable remedy, which is a pure vegetable preparation, and perfectly harmless, as it contains no opium in any form. Sold everywhere.

Allen's Lung Balm. A GOOD FAMILY REMEDY! THAT WILL CURE COUGHS, COLDS, CROUP! MOTHERS, Have your delicate, weakly children, who are always taking cold and subject to Croup? Remember, there never was a case of Croup which did not originate in a cold! Lung Balm is your remedy. READ THE FOLLOWING: WHOOPING COUGH CURED. O. A. HARRIS, of Benevolence, Ga., writes, Dec. 13, 1884: "My little boy, but little more than a year old, had a severe attack of WHOOPING COUGH, which my family physician said could not be cured, as it was winter. Having heard of the merit of ALLEN'S LUNG BALM, I immediately proceeded to town and purchased a bottle. To my surprise, this one bottle cured him sound and well. Others, hearing of the result, tried it, with equally good results. I have two little girls had Whooping Cough, and one bottle cured both of them. We think Whooping Cough is not much to be dreaded, if ALLEN'S LUNG BALM can be had and given."

PINKEYE. This is the Easiest Running Well Drilling Machine ever made. It brings the cutting to the surface at each stroke of the drill. Send for our circular and see why the horse is taken away and a man pushing the lever. Loomis & Nyman, Tiffin, Ohio.

A Remarkable Cure of a Horse. In the fall of 1883 I had a valuable horse taken with the pinkeye, resulting in blood poison. After nine months of doctoring with all the remedies to be found in horse books, I despaired of a cure. His right hind leg was as large as a man's body, and had on it four forty running sores. He was a most pitiable looking object. At last I thought of Swift's Specific, and commenced to use it. I used fifteen bottles. In August last all symptoms of the disease disappeared. There has been no return, and the horse has done a man's work in my farm ever since. JAS. L. FLEMING, Augusta, Ga. January 3, 1885. Swift's Specific is entirely vegetable. Treatment on Blood and Skin Diseases mailed free.

Had the Number Craze. Two railroad men were talking over old times. Inquiry was made as to what had become of an old freight brakeman named Jack Taylor. "Didn't ye hear about Jack? No? I thought everybody knew what he come to. Poor old Jack—he'll never twist another brake or swing another lamp." "Dead?" "No, but he might as well be. You see Jack got the number craze. He got 'em bad, too, and—"

"The what?" "The number craze. You don't know what that is? You eastern railroaders don't seem to know much of anything. Well, Jack got 'em, his being the third case I ever heard of. Seven or eight years ago they took hold of Jack, and they kept growin' worse. In 1883 I believe it was, he started out to find the number of the year. Long about the middle of the summer he found it. Then he was happy. But New Year's day he started out hunting for 1884. He looked all summer and all fall. Finally cold weather came, and would you believe it, Jack would sit out on the top of the cars in the freezing weather looking for a car number 1884. Whenever we passed a side-track he'd look at the cars like a wild man. He got so crazy over it that he mightly near lost his job. Christmas day he found his car loaded with Hops and Malt Bitters bound for St. Paul and Minneapolis billed to Noyes Bros. & Cutler, Merrell & Ryan and Ryman Eliel, Drug Co. By the way, Jack's taking those bitters now and thinks he will be all right again this spring. He says it is the best blood purifier he ever heard of."

"Is that so? Guess I'll try it, Good-bye, Bill." "So long, Mike. Will see you at the switch." The house of commons refused to order the evacuation of the Soudan by a vote of 143 to 39. Twenty-Five Per Cent Stronger Than Any Other Butter Color. BURLINGTON, Vt., May 23, 1882. I hereby certify that I have examined the Butter Color prepared by Wells, Richardson & Co., and that the same is free from alkali or any other substance injurious to health; that I have compared it with some of the best of the other Butter Colors in the market and find it to be more than twenty-five per cent stronger in color than the best of the others. I am satisfied that it is not liable to become rancid or in any way to injure the Butter. I have examined it after two months free exposure to the air in a place liable to large changes of temperature, and found no trace of rancidity, while other kinds similarly exposed became rancid. A. H. SALIN, Prof. Chemistry, University of Vermont.
